

User Stories

This is a joint project between Eshamogbo Ojuba and Olumide Awofeso; members of Puff-Puff inc. for Clarifais Clarifornication challenge ¹

1. As a user I'd like to be protected from nsfw images and videos on the web
2. As a user I'd like to be able to pause the extension
3. As a user I'd like to be able to give developer feedback
4. As a user I'd like to be able to define what level of nsfw-ness is appropriate
5. As a user I'd like the extension to not consume too much resources
6. As a user I'd like the extension to be affordable
7. As a user I'd like to black-list certain websites
8. As a user I'd like the interface to be intuitive
9. As a user, I'd like the extension to block nsfw and videos that passes through adblock
10. As a user, I'd like the extension not to consume huge amounts of bandwidth
11. As a user, I'd like the option of entering certain troublesome websites for increased monitoring
12. As a user I'd like to install the extension from the chrome webstore

Developer Stories

1. As a developer I'd like it to be fast
2. As a developer I'd like it to be secure
3. As a developer I'd like it to be light on memory usage
4. As a developer I'd like it to be ad-free
5. As a developer I'd like it to be bug-free (lol, duh)
6. As a developer I'd like it to be reliable
7. As a developer I'd like to not have to pay clarifai money
8. As a developer I'd like to not have to make duplicate api calls (Efficient)
9. As a developer I'd like it to exit cleanly when browser is closed
10. As a developer I'd like it to be a chrome and firefox extension
 - a. But chrome first
 - b. By separating the core aspects and the browser specific aspects
11. As a developer I'd like the browser to cache api call responses?
12. As a developer I'd like it to become faster and smarter with time
13. As a developer I'd prefer to send the image directly from server to api rather than client if possible
